- Data Engineering
- Predictive Analytics
- AI and Data Literacy Training
- Emerging Technology
- AI/ Machine Learning
- Digital Services

We are a mission-focused AI and data firm supporting DoD readiness, resilience, and decision advantage to help the modern warfighter achieve their mission.

WHAT MAKES AVENIR DIFFERENT

- Deep understanding of advanced technology
- Combined 70 years' government and DoD experience
- End-to-end support and increased data literacy
- Trusted by Fortune 100 companies
- Top technology talent and DoD cleared personnel (former Google, top 1% Kaggle competitions, former Oracle, former Cognosante)

Helping DoD leadership and the warfighter harness the power of technology to achieve their mission

Avenir Technology offers extensive expertise in AI, data analytics, and machine learning, providing products and services to support warfighters and DoD leadership. Our team delivers interoperable, cyber-resilient data solutions supporting JADC2 and real-time warfighter decision-making. We also drive operational efficiency with AI solutions.

Avenir's team has expertise in AI and data analytics. Our team has over 70 years' collective experience in supporting AI/ML, data engineering and analytics. Our team has deep expertise in DoD and government IT. Avenir's staff have supported the DoD, VA, DHS, and other agencies. Our team also has past experience and expertise in data interoperability, decision advantage, data mesh, and trusted AI solutions.

Avenir Technology is also leading the ACT-IAC AI Government Playbook.
