

We're a woman-owned small business founded by a team known for successfully delivering high-profile identity management, biometrics, credentialing, and analytical solutions for clients around the world. We're a forward-thinking, human-centered, emerging technology, and analytics company that delivers capabilities to transform your business, because we understand the mission and how to build solutions that align to your goals.

Services We Provide

Program Strategy and Execution

We help organizations implement complex solutions through end-to-end analysis, strategy development and implementation, building action plans aligned to business objectives and communication strategies that engage stakeholders and enable successful execution. Our approach examines all alternatives to achieve your end-state vision, while considering technical, policy, change management, communications, and other impacts to deliver mission-critical results.

Human-Centered Design

We employ a human-centered approach to solution design from day one, gathering input from a comprehensive range of stakeholders to optimize operational outcomes and buy-in. Our outcomes focus on optimal user experience to achieve operational goals that reduces rework and solution maintenance and introduces consistency across the enterprise.

Emerging Technology Integration

We apply emerging technology to client mission challenges using a methodology to quickly assess capabilities, rapidly prototype operational applications, and align fit with existing investments. We balance the risk of immature technology with the promise of transformation by aligning our client's mission with right-fit technology. Key areas of expertise include biometrics, digital identity, and artificial intelligence.

Data Science and Analytics

We use data science, engineering, analytics, modeling, and visualization to assist clients in harnessing their data to bring operational intelligence that assists with data-driven decision making. Our experience in solution design, development, and delivery have formed our foundational knowledge of proper data design, engineering, analysis, security, and management.

Cybersecurity

We work at identifying and mitigating cybersecurity risks inherent to all of our technology delivery in an increasingly digital world. Our cybersecurity experts know that Zero Trust is a journey. With deep experience including digital identity and access management, biometrics, clinical data management, and DevSecOps, we can help strengthen cyber defense for data, devices, applications, network and identity. No matter where your organization is with its cyber strategy, we can develop and implement Zero Trust roadmaps to mature capabilities and programs at every level.

Domain Expertise

- Cybersecurity and Zero Trust
- Traveler Processing
- Biometrics
- Strategic Communications
- Human Centric Design
- Digital Identity
- Artificial Intelligence
- Cloud Computing
- Identity and Credential Access Management (ICAM)
- Mobility
- Automation

Delivery Experience

- CBP Biometric Entry Exit, Land Border Integration, and Non-Intrusive Inspection
- DoD Common Access Card
- GSA USAccess Managed Service Offering
- TSA Identity Management
- FEMA and USCIS Identity, Credential and Access Management

Certifications

- SBA Certified Woman Owned Small Business (WOSB)
- CMMI SVC / 3
- CMMI DEV / 3
- ISO 9001:2015

Contract Vehicles

- GSA Multiple Award Schedule #GS-35F-584GA: 54151S, 541519
- DHS ICAM Blanket Purchase Agreement (BPA) for Identity, Credential and Access Management Support Services
- CBP Enterprise Small Business BPA Professional Services Track

Recognition

- 2024 & 2023 Washington Post Top Places to Work
- 2023 Women Presidents Organization Fastest 50 Award
- 2023 & 2022 INC 5000 list of fastest-growing private companies
