

SLALOM BRINGS MORE TO GOVERNMENT

Slalom is the world’s largest privately owned technology services firm, known for market-leading AI, Data, and Cloud capabilities and success serving both commercial and public sector organizations.

Through our partnership with OpenAI, we help organizations build momentum with *AI that makes a difference.*

LASTING IMPACT

We combine commercial best practices with federal expertise and collaborate with you to customize solutions that steward taxpayer dollars responsibly while delivering lasting results.

We partner with your teams every step of the way, *teaching and empowering them to continue the momentum even after we leave*

GOVERNMENT-READY, COMMERCIAL-GRADE

Together, we can solve tomorrow’s challenges with AI.

TRUSTED BY OUR CLIENTS & PARTNERS

“Slalom’s exceptional innovation, deep technical expertise, IT agility, and committed team tackled one of our most challenging programs, demonstrating unwavering dedication and expertise. They consistently delivered quality results at an impressive pace, significantly advancing this program’s modernization goals. I am deeply grateful for their outstanding partnership and steadfast support to help drive our mission success.”

DHS IT SES

AWS GenAI Consulting Partner of the Year - Global - 2024

Google Cloud AI Partner for the Year for Public Sector - 2025

Snowflake Global Data Cloud Services AI Partner of the Year - 2025

Salesforce #1 partner in North America for AI - 2024

How it works

Federal agencies gain access to ChatGPT Enterprise through GSA Multi Award Schedule (MAS) contract for \$1. Slalom provides strategy, adoption, training, and change management services to accelerate responsible AI adoption across the government. This empowers agencies to modernize operations, improve mission delivery, and build AI-enabled teams with enterprise-grade governance.

PACKAGE OFFERINGS

Slalom and OpenAI collaborated to create a set of packages designed to meet Federal customers where they are in their AI journey, including solutions for early experimentation and organization-wide transformation.

Package	Duration	# of users	Description
Starter	5 weeks	5k-25k	Includes workshops and rollout documentation. It covers base training, as well as an adoption plan.
Foundation	12 weeks	5k-50k	Includes base training, setting up a champions network for your organization which will stand as the bedrock of AI adoption, as well as expanded executive coaching.
Momentum	26 weeks	5k-100k+	Includes all Foundation package activities and deliverables and adds ongoing AI coaching for an additional 14 weeks. This ensures that your teams sustain the adoption effort after the champions network is built and AI tooling is rolled out.
Scale & Sustain	52 weeks	5k-100k+	Includes the Momentum package activities and deliverables as well as sustained support for an additional 26 weeks. It provides the most robust adoption rates and incrementally higher value extracted from the toolset, with ongoing support to the champions network. It also allows for regular content refreshment as AI features are added to ChatGPT Enterprise.

SCOPE OF WORK

Governance & Strategy Alignment:

Executive workshops, roadmap prioritization, and leadership coaching.

Change Management: Communications strategies, adoption playbooks, champions enablement.

Training & Enablement:

Courses from ChatGPT 101 - 201, Train-the-Trainer, enablement, and hackathons.

Sustainment: Ongoing AI coaching, adoption tracking dashboards, API use case ideation, and CoE maturation.
