

SHC Federal
BY SUMMIT HUMAN CAPITAL

**Your Federal Workforce
Advantage.**

Capabilities Overview

SHC Federal is a dynamic **certified small business** that delivers IT technology solutions in six key areas: **Digital Transformation, Data Analytics, IT Infrastructure, Cybersecurity, Software Engineering, and IT workforce solutions.** We support complex, high-visibility Federal programs through **cleared technology teams, agile engineering and integration, and scalable workforce solutions.**

The SHC Federal Advantage

With decades of combined experience, SHC Federal prides itself on quality, execution and reliability.

Differentiators

- Small business agility with enterprise-level delivery capabilities
- Proven track record supporting 20+ agencies/departments and proven success supporting multibillion dollar, high-visibility Next Generation programs
- Rapid deployment of cleared technical teams across cloud, cybersecurity, and engineering domains
- Integrated delivery model combining engineering expertise with workforce agility
- Expertise across AWS, Azure, GCP, ServiceNow, Kubernetes, Terraform, and applications
- PMO establishment and operational support

CAGE: 884U3 | UEI: D6FMHJLTKA66 | NAICS: 541511, 541512, 541513, 541519, 541611 | Certified Small Business

Core Capability Pillars

Digital Transformation

- Cloud development and modernization (cloud-native, hybrid, and multi-cloud architecture)
- DevSecOps and automation (CI/CD, Infrastructure as Code, pipeline security, automated testing)
- Cloud migration, landing zone implementation, and environment provisioning
- Platform engineering and automation for repeatable, secure deployments
- Emerging technology integration, including AI/ML, IoT, and edge computing
- Enterprise architecture and digital modernization road-mapping

Data Analytics/Data Modernization

- Data engineering (data pipelines, orchestration, data quality, data governance support)
- Data science and advanced analytics (forecasting, anomaly detection, mission insights)
- Data warehousing and optimization (lake and warehouse implementations, performance tuning)
- Data visualization and decision support dashboards
- Architecture, visualization, optimization, and analytics modernization
- Data platform modernization and migration (cloud data platforms, hybrid architectures, legacy-to-modern transitions)

IT Infrastructure & Engineering

- Network engineering, modernization, and enterprise network design
- Virtualization, compute, storage, and enterprise infrastructure operations
- Hybrid environment integration (cloud/on-prem connectivity, identity integration, shared services)
- Multi-level security (MLS) and cross-domain environment support
- Monitoring, observability, performance tuning, and reliability engineering
- End-user support engineering, technology refresh planning, and enterprise sustainment

Cybersecurity

- Identity and access management (IAM), including SAML, OAuth, and single sign-on integration
- Zero Trust architecture adoption and security modernization support
- Security architecture engineering (applications, data, infrastructure, and cloud environments)
- Defensive cybersecurity (security operations support, threat hunting assistance, incident response support)
- Compliance and risk management (ATO support, control implementation, continuous monitoring)
- Vulnerability & configuration management program support
- Supply chain risk management and secure technologies assessment

Software Engineering

- Full-stack application development (web applications, APIs, enterprise integration)
- Cloud configuration and environment readiness for dev, test, and production workloads
- COTS implementation (configuration, customization, integrations, sustainment)
- Legacy application modernization (refactor, re-platform, re-host, containerization)
- Automated testing and quality engineering; secure SDLC practices
- Agile team delivery, including Scrum Masters, Product Owners, and engineering pods

IT Workforce Solutions

- Full lifecycle recruiting for federal IT programs (staff augmentation, contract, direct hire)
- Rapid staffing for surge requirements, high-priority initiatives, and cleared personnel
- Delivery of full agile teams for cloud, cybersecurity, data, software engineering, and infrastructure
- Workforce planning, retention support, continuity of operations, and knowledge transfer
- Specialized cleared talent placement (Public Trust, Secret, Top Secret, SCI, Poly—where applicable)
