CAPABILITIES

Thorsen Logistics Group, LLC is a Service-Disabled Veteran-Owned Small Business (SDVOSB) specializing in federal procurement, sourcing, and distribution of mission-critical products for U.S. Government customers. The company operates as a procurement-focused distributor and value-added reseller supporting VA, DLA, and DoD requirements through compliant sourcing, authorized supply chains, and disciplined execution.

Core capabilities include RFQ analysis, compliant sourcing, pricing coordination, contract execution, order fulfillment, and delivery management. Thorsen Logistics Group supports both open-market and set-aside acquisitions in accordance with FAR, DFARS, SBA regulations, and Non-Manufacturer Rule requirements.

Product support includes medical supplies and equipment, safety and PPE, janitorial and sanitation products, office supplies and equipment, facilities products, furniture, and general MRO items used in federal operational and facility environments. All sourcing is conducted through manufacturer-authorized distributors to ensure traceability, documentation integrity, and audit readiness.

Thorsen Logistics Group maintains active FMCSA broker authority and can coordinate freight movement when required in support of awarded federal supply orders. Freight services are provided as part of procurement and distribution execution and are not offered as standalone transportation services.

Internal workflows emphasize compliance screening, RFQ vetting, documentation control, and award readiness prior to submission, reducing procurement risk for government buyers and prime contractors. As an SDVOSB prime and subcontractor, Thorsen Logistics Group provides reliable, compliant fulfillment solutions designed for repeat federal sourcing needs.
